Employment History

June 2021 — Present
GURUGRAM

Software Development Engineer - I
TATA 1mg

Tata 1mg, previously **1mg**, is a healthcare platform based in Gurgaon, India. It provides services, including e-pharmacy, diagnostics, e-consultation and health content.

- Creating new features, functionality and capabilities for web apps using React JS on the client-side and Node JS for SSR
- Converted the entire PWA application with async reducers approach bringing the app bundle size from 137kb to 50kb gzipped, increasing the code coverage and bringing down LFC by 1 second
- Integrated 1mg with TATA Neu
- Worked on the enhancement of webview and in making them perform efficient even in poor network coverage
- Profiling, troubleshooting and bug fixes resulting in system performance and scalability improvements.
- Performing bug fixes and code reviews.

Feb 2019 — May 2021
NEW DELHI

Front End Developer
Lattice Innovations

Lattice Innovations offers product design services - both hardware and software - for medical devices, healthcare IT, life sciences, and more.

- Creating new features, functionality and capabilities for web apps using Angular 2+ and React JS framework.
- Conducting requirements gathering and validation as a part of collaboration for the high-profile external web app that helps to address the client's need through important UI/UX parts of the system before the active phase of development begins.
- Developing highly modularised design in JavaScript to ensure re-usability, extensibility and ease off maintenance.
- Integrating with third-party services and external APIs and using complex libraries such as Socket.IO for showing data in real-time.
